Mary Jane

I would recommend your company to my friends and business associates. The rating would be a 10

Timeline

YOUNG

Week	Milestone	Tasks & consideration	Risks
1-2	Project Setup & Planning	<ul style="list-style-type: none"> - Set up project repository, CI/CD pipeline, and environment - Finalize project requirements - Create a detailed timeline - Initial design concepts and wireframes 	Risk of delayed requirement finalization; mitigate by having clear and prompt communication
3-4	Core System Architecture	<ul style="list-style-type: none"> - Develop database schema - Set up authentication and authorization modules - Finalize UI/UX design for core components 	Misalignment in data models or design misfits; mitigate by frequent syncs and shared documentation
5-6	Admin Dashboard	<ul style="list-style-type: none"> - Implement Super Admin features (User management, Settings) - Implement Website Manager and Accountant features - Design refinement for Admin Dashboard 	Integration issues between Admin roles or design inconsistencies; mitigate by thorough testing and code reviews
7-8	Vendor Dashboard	<ul style="list-style-type: none"> - Develop Owner and Vendor Manager features - Implement Vendor Accountant features - Design Vendor Dashboard and ensure alignment with Admin Dashboard 	Complexity in Vendor reporting features or design misalignment; mitigate by incremental feature implementation and regular design reviews

Week	Milestone	Tasks & consideration	Risks
9-10	User/Buyer Dashboard	<ul style="list-style-type: none"> - Implement Registered User features - Implement Guest User and miscellaneous features - Finalize design for User/Buyer Dashboard 	Delayed UI/UX decisions or design inconsistencies; mitigate by parallel design work and early feedback loops
11	Core System Architecture	<ul style="list-style-type: none"> - Create API endpoints for data push/pull and notifications - Implement email and synchronized notification system - Ensure consistent design across all integration points 	API integration failures or design inconsistencies; mitigate by mock testing, validation, and design reviews before production use
12	Testing & Debugging	<ul style="list-style-type: none"> - Conduct unit testing and bug fixing for Admin & Vendor Dashboards - Conduct unit testing and bug fixing for User Dashboard and API integrations - Ensure design integrity during testing phases 	Overlapping bugs or design issues; mitigate by assigning dedicated testing phases and cross-testing roles, with design checks
13	Final Review & Deployment Prep	<ul style="list-style-type: none"> - Finalize documentation and prepare deployment scripts - Conduct final user acceptance testing and fix any last issues - Review overall design for final adjustments 	Last-minute issues or design inconsistencies; mitigate by buffer time and having rollback plans

Questions

- **what do you mean by**

- Monitor system performance and security
- Oversee platform maintenance and updates
- Collaborate with platform admins on major decisions
- Update product details, pricing, and availability.
- Access vendor-specific analytics and sales reports with basic filters (Date, Value, Product).
- Access vendor-specific analytics and advanced sales reports with detailed filters (Card Payments, Customer Name)
- Pixel integration for data collection to support CRM.
- Live tracking for shipments.
- Automatic cancellation for placed orders within 24 hours.
- - gameification based on customer ratings and storing/sharing this data (bardo from the suppliers list zy linkedin el hwa bar w tecomplete ur profile “gamefication”).
